GLOBAL 2000

Depopulation Program

The Plan to Kill Three Billion Entities
and what you can do about it, if you don't like the idea

**"We are going to get Global 2000 implemented,
one way or another by famine, starvation, or by choice...
We need a real economic shock,
a depression to get our message across."**

Statement of a Zero Population Growth spokesman (9/18/81)

HOW GLOBAL 2000 CAME INTO BEING

(From Revelations of Awareness 82-4)

How Global 2000 Came into Being

This Awareness indicates this as associated with the **Global 2000 plan** of diminishing the population on the Earth.

This Awareness indicates that this plan was devised some time back, approximately 10 years previously, and has been in development for some time. This Awareness indicates that this as having certain justification from a particular viewpoint, if entities can accept such justification.

This Awareness indicates that in looking at this from the viewpoint of the world planners, (those who manipulate the masses), to understand their thinking, (not to *condone* their thinking); this Awareness wishes you to give at this time, the scenario of why and how they came to this conclusion. This Awareness indicates that the resources of the Earth are quickly being depleted by the consumers of the Earth, who are multiplying at alarming rates, mushrooming in terms of population growth so that proportionally, they are increasing in numbers in quantum leaps. The resources on Earth, being in limited supply, are being depleted by these increasing number of entities, of hungry and desirous beings who, to the world planners, are of little more significance than numbers on a computer.

This Awareness indicates that the use of these entities, the labor force of millions and billions of laborers to create cities, highways, homes, parks, waterways, ships, trains, airplanes, vehicles, to service and create these systems; the use of these many laborers to create such wealth and civilization has essentially run its course, and now machines, or few laborers are necessary for the maintenance of that which has already been created; and further creations are only necessary to accommodate the increasing population which is depleting the resources, such as food and oil.

This Awareness indicates that these world planners, therefore, see that to now reduce the population, rid the Earth of approximately 3 billion entities, would be an economic move that would leave a kind of paradise for those remaining, whereby all the fruits of labor from those entities now removed would fall to those who remain, whereby each nation around the world would have its own cities, its own resources in plentiful supply, and the choice of many places to go and to be. This Awareness indicates these entities would inherit the Earth with all its goodies.

This Awareness indicates that these world planners see that the alternative would be to watch the population continue to grow, to develop from 4 billion (in 1984) to 7 billion within approximately 20 years, From 7 billion, the energies would be depleted much more quickly, starvation would follow, chaos and social strive would follow, and still population would continue to rise, unless some program were developed to stop the population growth.

This Awareness indicates that the world planners see the future as being black if they do not take some drastic action to limit population growth; and yet they see little efforts by those third world countries to take such action, to educate the people to limit the population growth. This Awareness indicates that therefore, they see the necessity to bring about the destruction of these entities through famine, pestilence, biological warfare.

This Awareness indicates that this concept was briefly mentioned in the movie called *Executive Action*, that which dealt with the fictionalized version of the assassination of John Kennedy, wherein it was described in terms of the necessity to rid the world of undesirables in the future. This Awareness indicates that this program as that which has been planned, and has been put into operation in various ways, and which is growing in momentum.

This Awareness indicates that the Medical Association is involved, the governments of many nations are involved.

The Global 2000 Population Reduction Plan officially began during the **Carter Administration** - the current plan stems from the "Global 2000 Report" to the President., an 800 page study submitted by the State Dept. and the Council on Environmental Quality to Carter (first printed in Great Britain in 1982) However, the mass-genocide idea was originally started about 10 years ago by members of the Club of Rome according to the Spiral Report Volume 111, #3 - March, 1982.

Letter of Transmittal

(Excerpts from the first page of The Global 2000 Report to the President)

Sir: In your environmental Message to the Congress of May, 1977, you directed the Council on Environmental Quality and the Department of State, working with other federal agencies, to study the "probable changes in the in the world's population, natural resources, and environment through the end of the century." This endeavor was to serve as the "foundation of our long-term planning." The effort we then undertook to project present world trends and to establish a foundation for planning is now complete, and we are pleased to present our present report to you. What emerges are not predictions but rather projections developed by the U.S. Government agencies of what will happen to population, resources,
and environment if present policies continues.

Our conclusions, summarized in the pages that follow, are disturbing. They indicate the potential for global problems of alarming proportions by the year 2000. Environmental, resource, and population stresses are intensifying and will increasingly determine the quality of human life on our planet. These stresses are already sever enough to deny many people basic needs for food, shelter, health, and jobs, or any hope for betterment. At the same time, the earth's carrying capacity -- the ability of biological systems to provide resources for human needs is--eroding. The trends reflected in the Global 2000 Study suggest strongly a progressive degradation and impoverishment of the earth's natural resource base.

If these trends are to be altered and the problems diminished, vigorous, determined new initiatives will be required worldwide to meet human needs while protecting and restoring the earth's capacity to support life. Basic natural resources--farmlands, fisheries, forests, minerals, energy, air, and water--must be conserved and better managed. Changes in public policy are needed around the world before problems worsen and options for effective action are reduced.

* The Federal agencies that cooperated in this effort were the Department of Agriculture, Energy, and the Interior, the Agency for International Development, the Central Intelligence Agency, the National Aeronautics and Space Administration, the National Science Foundation, the National Oceanic and Atmospheric Administration, and the Office of Science and Technology Policy.
